## EPIDEMIOLOGIST

---

### RELEVANT EXPERIENCE

#### EPIDEMIOLOGIST II, WATERBORNE DISEASES KY DEPT. FOR PUBLIC HEALTH, REPORTABLE DISEASES SECTION

May 2022 – PRESENT

Serves as the lead for ELC Project P (Legionellosis) CDC grant. Performs complex epidemiological data analyses using statistical software to conduct data management and analysis and to maintain and update surveillance processes. Coordinates *Legionella* surveillance, investigation, and response activities across the Department and with the local health departments. Supervises/coordinates work of other epidemiologic staff and/or programs including student interns. Performs other duties as required.

---

#### EPIDEMIOLOGIST I/DATA MANAGER KY DEPT. FOR PUBLIC HEALTH, HIV/AIDS SECTION

Jul 2017 – Apr 2022

Analyzed HIV/AIDS data using epidemiologic methods, primarily for the Ryan White HIV/AIDS Part B Program. Provided data needs assessments for the evolution of the health programs and Section grants preparation. Conducted public health investigations for the HIV Surveillance Program. Completed CDC Routine Interstate Duplicate Review (RIDR) working with other state jurisdictions, with 100% completion status. Updated, maintained, and provided administrative monitoring of the online TRAIN Kentucky course: HIV/AIDS Security and Confidentiality Training Module 1024243. Maintained the Section webpage and subpages, including the Kentucky Syringe Service Programs.

#### COVID ELR/ECR ANTIGEN EPIDEMIOLOGIST (50% efforts)

Apr 2020 – Feb 2021

Assisted the COVID-19 response in the roles of Subject Matter Expert (SME) at the call center, COVID ELR epidemiologist and later ECR Antigen Epidemiologist—processing electronic labs and case reports in NEDSS two to three times per week.

---

#### DATA ANALYST UK HUMAN DEVELOPMENT INSTITUTE, EVALUATION UNIT

Apr 2015 – Aug 2016

Conducted telephone interviews with public education professionals for a statewide public education evaluation. Transcribed stakeholder interviews. Cleaned and coded quantitative data for statistical analysis using Excel and SPSS. Entered quantitative and qualitative data into databases and online interactive dashboards using ClicData. Created online surveys using Qualtrics survey software. Created maps for publications using ArcGIS. Compiled meeting minutes for regional and state stakeholders. Developed graphic displays of data results (tables, charts, posters, and presentations).

### PROFESSIONAL SUMMARY

Skilled in conducting epidemiological research, analyzing data, and project management. Passionate about designing data visualizations that are both captivating and intuitive.

Extensive experience with computer applications, operating systems, and database management.
